# Parison Table Light

**Designer- Cheshire Architects / Year 2018**

The Parison Table Light is a collision of technology and craft. Its faceted, digitally forged form is manifested through the warmth of a frosted glass shade, and anchored at the base by a delicate slither of brass.

The final effect is a soft milky table sculpture which emanates light, resembling a soap bubble resting on a tabletop.

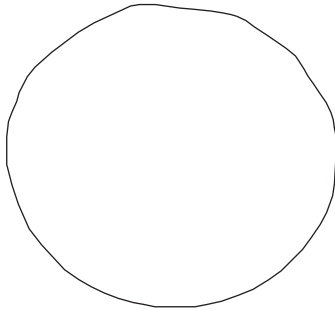

As a piece, the Parison Table light quietly anchors a room, subtly and deliberately imperfect, glowing softly and holding its own.
