Bloom Table Light

Designer- Tim Rundle / Year 2018

The Bloom Table lights' super-elliptical form is inspired by the gentle dynamic flow of paper lanterns. Its glorious lit effect is the result of light passing through a finely perforated mesh core and onto the inside of the frosted blown glass shade, thus creating a distinctive pattern.

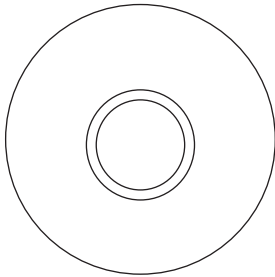

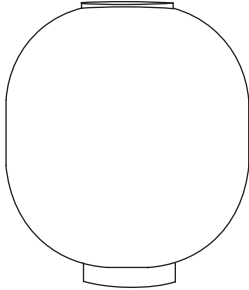

Sitting proudly atop a plated stainless steel base, the Bloom Table light projects a warm consistent hue upwards into a space. Available in White or Black, Bloom is a versatile, value for money table lamp.
