

# Resident

Resident releases the iconic Circus Lights in Black.

Resident is proud to be adding to its acclaimed Circus Lighting family, with the introduction of a powder coated Black finish across eighteen models.

The Circus Lights are handmade in New Zealand and are available in 250, 500 and 750mm diameter rings. The change comes into immediate effect with stocked items already available for sale.

Designed by Resident Studio, the Circus lights were first released at the Salone del Mobile Milan in 2017. Utilizing LED technology and integrating circuits with Residents revolutionary 'plug and play' mechanism, these bold and theatrical designs have been installed in a variety of inspirational spaces around the world.

Quote from Resident Co-Founder, Scott Bridgens

"The Circus Lights in Black are a welcome addition to our burgeoning lighting range. The Black version is vivid and curvaceous, and offers yet another option to compliment the spaces where people live, work and play".
